

# Zaha Hadid Architects

# Zaha Hadid Architects | PARAMETRIC TOWER RESEARCH

Thirty years after founding the office **Zaha Hadid Architects** ZHA one looks back on a long list of different and ambitious projects worldwide. The theoretical framework for this oeuvre has been build up via the remarkable academic achievements in architectural theory of **Zaha Hadid** and **Patrik Schumacher**.

Exclusively the **AIT-Architektursalon** shows this year a selection of works by Zaha Hadid Architects. Models, Pictures and Multimedia Presentations explain a new High Rise Typology – relating to the concepts and ambitions of parametricism.
